Omaha, Nebraska 68107

Hello!

Good to hear from you. We've received several requests for verifications on our freq checks before but I was rather surprised to get one this time. This of course because of the flood and all the stations staying on full power for the duration of time they did. We also had plans to stay on, but decided against it simply because of the fact that our signal did not reach into Rapid City. Bad mess out that way.

Your report is accurate to the letter. Our check began at 12:15 a.m. with the station ID and the fact that KCCR was on the air for frequency testing only. Station ID's also given at 12:20, 12:25, and 12:29:30 as stated in your report. Well done! If we can be of assistance again, feel free to call on us.

Best regards,

Dale Morud/CE
